

Vaccine Research Center Seminar Series

Autumn 2001

Seminars start at 4 p.m.
Building 40 (VRC), Room 1203

9/25	Dr. Barney Graham VRC/NIAID	<i>Pathogenesis of respiratory syncytial virus: Implications for vaccine development</i>
10/9	Dr James Hoxie University of Pennsylvania	<i>Structure/Function studies of CD4- independent HIV envelope glycoproteins</i>
10/16	Dr. Jeff Lifson NCI/Frederick	<i>Monkey Tales: Insights into AIDS Virus pathogenesis from studies of non-human primates</i>
10/23	Dr. Francine McCutchan Henry M. Jackson Foundation	<i>HIV Recombination and Vaccine Development</i>
10/30	Dr. Hana Golding CBER/FDA	<i>Dissection of HIV-1 entry mechanism by neutralizing antibodies to gp41 fusion intermediate structures</i>
11/6	Dr. Steve Hoffman Celera, Inc.	<i>From Genomics to Proteomics to Vaccine: A 21st Century Challenge</i>
11/13	Dr. Harriet Robinson Yerkes Primate Ctr & Emory Univ	<i>Working towards an AIDS Vaccine</i>
11/20	David Weiner University of Pennsylvania	<i>Improvements and complications of multicomponent DNA vaccines for HIV-1</i>
12/4	Dr. Robert Gallo Institute of Human Virology	<i>Some biological approaches to control HIV and HIV disease</i>
12/11	Dr. Marjorie Guroff NCI	<i>Immunogenicity and protective efficacy of adenovirus-recombinant vaccines for AIDS</i>
12/19*	Dr. Rafi Ahmed Emory University	<i>Immunological Memory: Lessons for vaccine development</i>

* Wednesday Afternoon Lecture Series (WALS), in Masur Auditorium, Building 10.
